## DFCD AT A GLANCE

|                    |                                                                                                                                                                                                                             |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Mission</b>     | DFCD enables private sector investments aimed at <b>climate resilience (adaptation) and mitigation</b> in developing countries, particularly to strengthen the climate resilience of vulnerable populations and ecosystems. |
| <b>Management</b>  | Consortium of FMO, CFM, SNV, WWF                                                                                                                                                                                            |
| <b>Size</b>        | EUR 440 Million                                                                                                                                                                                                             |
| <b>Instruments</b> | Grants and TA by WWF and SNV; Senior Debt and TA by FMO; Equity by CFM                                                                                                                                                      |
| <b>Funders</b>     | Dutch Government - Ministry of Foreign Affairs; European Commission                                                                                                                                                         |
| <b>Launch</b>      | May 2019                                                                                                                                                                                                                    |
| <b>Fund Term</b>   | Until 2037                                                                                                                                                                                                                  |
| <b>Sectors</b>     | Agriculture, Forestry, Environmental Protection, Water                                                                                                                                                                      |
| <b>Geographies</b> | Developing countries in Asia, Africa, Latin America<br>(Minimum 25% LDCs, 25% NL-Priority Countries)                                                                                                                        |
| <b>Sub-targets</b> | Minimum of 50% of investments in adaptation (target 65%)                                                                                                                                                                    |

# CRITERIA

## BASELINE

ELIGIBLE  
COUNTRY

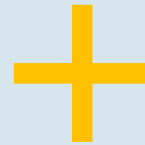

NATIONAL  
ALIGNMENT

COMMERCIAL  
VIABILITY

CLIMATE  
ADAPTATION

## ADDITIONALITY

BIODIVERSITY

GENDER EQUALITY  
AND SOCIAL INCLUSION

FOOD AND NUTRITION  
SECURITY

PREFERENCE:  
DUTCH BUSINESS LINK

# TARGETS

## DFCD CONSORTIUM

**25%**  
INVESTMENT IN  
LDCS

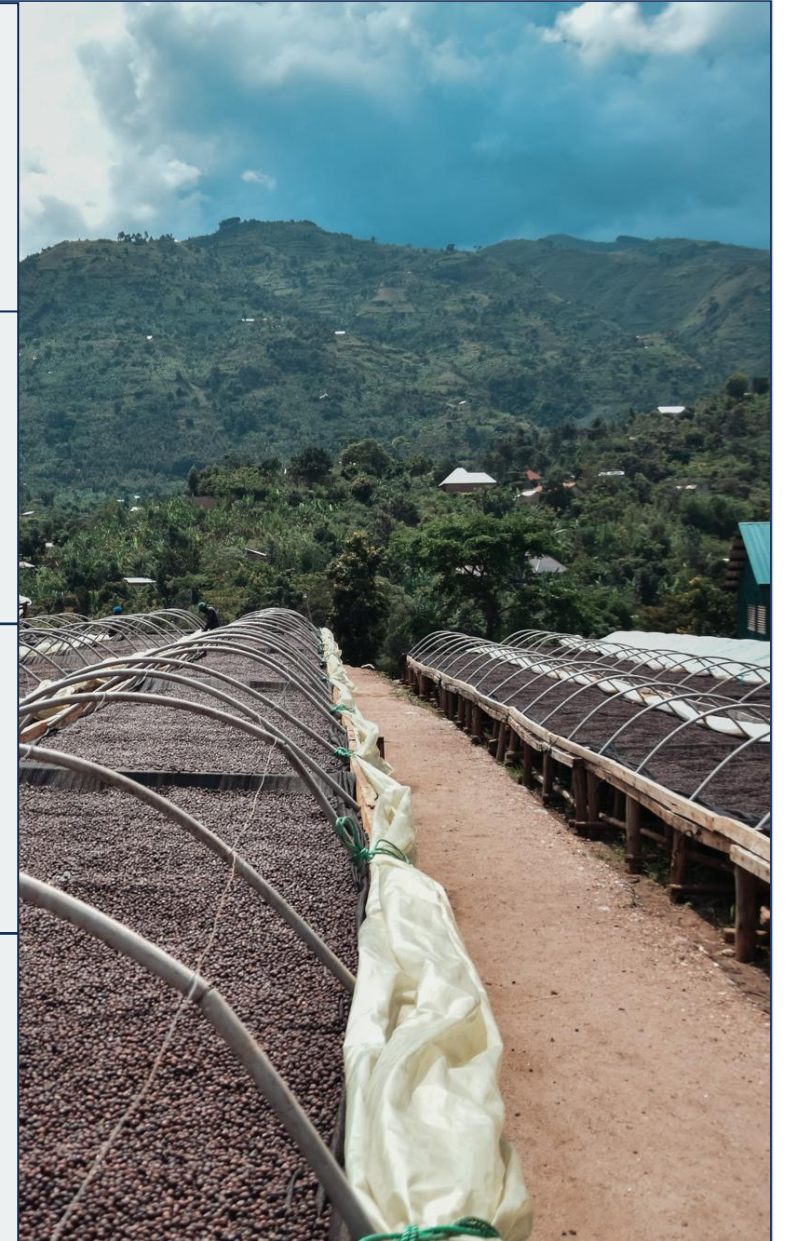

**€2BN**  
PRIVATE INVESTMENT  
MOBILISED

## ORIGINATION FACILITY

**40%**  
INVESTMENT IN  
LDCS

**90%**  
INVESTMENT IN  
CLIMATE ADAPTATION PROJECTS

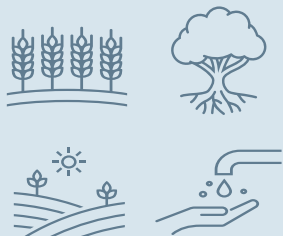

**25%**  
INVESTMENT IN  
BIODIVERSITY PROJECTS

## HOW DOES IT WORK

### BANKABLE PROJECTS

#### + **Criteria match:**

- Climate adaptation
- Biodiversity
- DGIS priority countries
- FNS where possible

### ORIGINATION FACILITY

Grants  
TA  
De-risking

HANDOVER

### LAND USE FACILITY

**FMO**  
Entrepreneurial  
Development  
Bank

### WATER FACILITY

**CLIMATE**  
FUND MANAGERS

### THIRD-PARTY INVESTORS

Debt  
Equity  
Hybrid
